

The Ultimate Driving Experience

Westfield Sportscars

Factory Built, Complete and Module Kits

Welcome

At Westfield we pride ourselves on providing the customer with a range of models and approaches to personalise your Westfield experience – so whether you’re looking for a sunny weekends driving, a track day experience or an out and out race car, buying a Westfield will help you gain the ultimate in driving pleasure. This brochure covers pricing and options for our factory built vehicles, and comprehensive self build packages which require no sourcing of other components.

Self Build

Self build packages can be purchased either as a complete package, or by module, sequenced to support the vehicle build in stages (not available for AeroRace and Mega Range). Each module contains every component for that stage of the build and can be purchased separately to match your budget and build programme. All parts provided are new and the average customer build time is 120 hours requiring no special tools or equipment. Your build is supported by comprehensive instructions and our famous factory support.

We do recommend specifying all options for self build projects at the outset, as some options require specific modifications to the vehicle which cannot be implemented at a later stage.

Models

	AeroRace	The ultimate for track and competition.
	Sport	Tailored for touring, at home on the track.
	AeroSport	Stripped out for road or track use.
	MegaBusa	Road legal with motorbike engine, focused for track.
	SEiGHT	V8 engine for road or track.

All models come with double wishbone independent suspension and disc brakes all round as standard.

Options and Colours

Please refer to the back of this brochure to identify vehicle options and colours.
